# 1 INTRODUCTION

1.1 In terms of section 79 (1) of the National Health Amendment Act 2013, (Act 12 of 2013), the OHSC is mandated to “inspect and certify health establishments as compliant or non-compliant with the norms and standards. The norms and standards for different categories of health establishments were promulgated in February 2018 and came into effect in February 2019.

1.2 Furthermore, section 78 (a) of the Act prescribes one of the objectives of the Office as “monitoring and enforcing compliance by health establishments with the norms and standards prescribed by the Minister in relation to the national health system.”

## 2 LEGISLATIVE MANDATE

- 2.1 The Constitution of the Republic of South Africa;
- 2.2 The National Health Act, 2003 (Act No. 61 of 2003), as amended;
- 2.3 Norms and Standards Regulations applicable to different categories of health establishments, 2016; and
- 2.4 Procedural Regulations Pertaining to the Functioning of the Office of Health Standards Compliance and Handling of Complaints by the Ombud, 2016.
- 2.5 The purpose of the report is to inform the health establishments, stakeholders, and the public/users of the health establishments that have been certified by the OHSC.

## 3 BACKGROUND

3.1 This bi-annual report covers the compliance certificates issued to health establishments which were inspected in the 2020/21 financial year. The list of health establishments in “Annexure A” are those establishments certified between April and September 2022.

3.2 In addition to the certification of health establishments, the OHSC has since commenced with the implementation of the enforcement processes and the affected health establishments are listed in “Annexure B”.

## **4 PROCESS FOLLOWED**

- 4.1 Following finalisation of the inspection report, the finalised inspections reports were subjected to an external review process for quality control and expert opinion. Feedback from the external reviewers were considered accordingly and reports were finalised for dissemination to the health establishments.
- 4.2 All final reports inspection findings were shared and communicated to health establishments, communicating the status in relation to compliance with the norms and standards. The OHSC has, in terms of the Procedural Regulations Pertaining to the Functioning of the OHSC and handling of complaints by the Ombud (the regulations), 15 days from the date of recommendation by an inspector, to issue a certificate of compliance to all deserving health establishments and the time frame was adhered to.

## **5 CERTIFICATION OF HEALTH ESTABLISHMENTS**

- 5.1 During the reporting period, a total of Hundred and Sixteen (116), establishments were certified by the OHSC. All health establishments found to be non-compliant with the norms and standards have been issued with a compliance notice stating the areas of non-compliance and the period within which the identified breaches should be addressed.
- 5.2 The OHSC will continue to monitor implementation of the conditions set out in the compliance notices and additional inspections will be conducted when the period stated in the compliance notices lapse. Compliance will be enforced against health establishments found to be persistently non-compliant after the additional inspections.

## **6 CONDITIONS FOR CERTIFICATION**

- 6.1 A certificate of compliance issued by the OHSC is valid for a period of four years and is subject to renewal. However, health establishments are required in terms of regulation 19 of the Procedural regulations pertaining to the functioning of the Office of Health Standards Compliance and handling of complaints by the Ombud to, within a period of not more than six months before

the expiry of the compliance certificate, submit an application to the OHSC for renewal of a certificate of compliance.

- 6.2 Should a health establishment issued with a compliance certificate be inspected for any other reason and thereafter a compliance notice issued against a previously certified health establishment the validity of a certificate of compliance is suspended until the conditions set out in the said compliance notice are fulfilled (Regulation 20 (2)).

## **7 COMPLIANCE ENFORCEMENT**

- 7.1 All non-compliant health establishments were issued with compliance notices, stating the timeframe within which to remedy the identified breaches. Additional inspections were conducted to determine if the breaches have been remedied.
- 7.2 Furthermore, all health establishments that were found to be persistently non-compliant were subjected to the enforcement process. To date, the only enforcement action taken against non-compliant health establishments is the issuing of a Written Warning. Annexure B is a list of all health establishments against whom the enforcement action was taken.
- 7.3 A total of 66 health establishments were issued with Written Warnings, outlining specific timeframes for responses. Further enforcement action will be considered should health establishments fail to remedy the breaches and/or respond to the Written Warnings issued.

## **8 CHALLENGES**

- 8.1 The majority of the inspected health establishments during 2020/21 financial year still did not achieve compliance status and were not eligible for certification.
- 8.2 Some health establishments do respond to preliminary findings however, evidence provided was either, irrelevant, or not acceptable.
- 8.3 Some health establishments provided information that indicated a serious lack of understanding of expectations and/or inspection requirements.

- 8.4 Different districts and sub-districts within the same province responded differently to the reporting process (responding to preliminary findings). This could be due to the proximity of the health establishments to the relevant required knowledge to respond to the OHSC (Information Communication Technology equipment).

## **9 CONCLUSION**

- 9.1 The OHSC is enjoined by the Act to inspect and certify health establishments as compliant or non-compliant with the prescribed norms and standards and to enforce where there is persistent non-compliance. Furthermore, the OHSC has a responsibility to publish and inform the public about the performance of health establishments in relation to the norms and standards. Health establishments are therefore encouraged to work tirelessly to ensure compliance with the norms and standards which is followed by certification by the OHSC.
